To Whom It May Concern:

TeamMastermind is a curriculum that greatly enhances the regular curriculum taught in public and charter schools. I have had the Mastermind program in my classroom for the past two years. My students absolutely love it. As a teacher, it is very rewarding to observe my students using creative thinking to solve a variety of problems based on a myriad of themes. The students are encouraged to take risks and to respect each other's ideas when making decisions. What a wonderful addition to our curriculum!

Mindy DeGraff has done a fantastic job developing TeamMastermind. The lessons are presented with enthusiasm and knowledge of just what students need for lifelong learning. Her program has made a positive difference in my classroom. My students eagerly look forward to each session and have definitely improved in working together cooperatively.

I would definitely recommend this innovative curriculum. It's a winner!

Sincerely,

Penny Bettes
